40	UC-06	Schedule Level for Medicines	No	Custom	(Mandatory) for Scheduled Medicine "Schedule Level" field appears with options: Schedule I / Schedule II / Schedule III / Schedule IV / Schedule V (configurable per country).
41	UC-06	Prominent colored Badges	Partial	Custom	(Mandatory) Scheduled Medicines are flagged with a prominent colored badge in the product list view.

#	UC ID	FEATURE	AVAILABLE IN ODOO?	TYPE	NOTES
42	UC-06	Automatic Chatter log	Partial	Custom	(Auto) Every change is logged in the product chatter with user, timestamp, and old/new value.
43	UC-06	Access Rights (Pharmacist)	Partial	Config	(Mandatory) Only users with the "Pharmacist" or "Pharmacy Manager" role can check or uncheck Scheduled Medicine field.
44	UC-06	Access Rights Authentication	No	Custom	(Mandatory) Adding a scheduled medicine to a sale order or POS invoice requires pharmacist authentication (password prompt or role check).
45	UC-06	Prescription (Rx) Validation	No	Config	(Mandatory) The sale cannot be completed without a valid linked Prescription (Rx) referencing this product.
46	UC-06	Maximum dispensable medicines	No	Custom	(Mandatory) Maximum dispensable quantity is hard-locked to the Rx quantity – no override allowed for scheduled medicines.
47	UC-06	Partial medicine dispense	Partial	Custom	(Mandatory) Partial dispense is supported: remaining Rx quantity stays open for future collection.
48	UC-06	Controlled Substances Register	No	Custom	(Mandatory) Every sale of a scheduled medicine auto-creates a log entry: Date & Time, Patient Name & ID, Product Name, Schedule Level, Lot/Batch Number, Quantity Dispensed, Dispensing Pharmacist, Rx Reference Number.
49	UC-06	The register is read-only	No	Custom	(Mandatory) The register is read-only once written – no editing or deletion allowed.
50	UC-06	Accessing the Register	No	Custom	(Mandatory) The register is accessible from a dedicated menu: Pharmacy > Compliance > Controlled Substances Register.
51	UC-06	Monthly Register Report	No	Custom	(Mandatory) A monthly register report can be exported as PDF and Excel, formatted per Ministry of Health requirements.
52	UC-06	Multiple Scheduled Rx (within same 30 days)	No	Custom	(Auto) An alert is sent to the pharmacist if a patient purchases scheduled medicines from multiple Rx within a configurable time window (e.g., twice in 30 days).
53	UC-07	Public Price (People's Price)	No	Custom	(Mandatory) A "Public Price" (Sales Price) field is always visible on the product form, The price is stored in the base currency of

#	UC ID	FEATURE	AVAILABLE IN ODOO?	TYPE	NOTES
					<i>the pharmacy..</i>
54	UC-07	Multi-currency for Public price	Partial	Config	(Mandatory) Multi-currency support: the price can be displayed in other currencies using exchange rates configured in accounting settings.
55	UC-07	Public Price on POS and all Invoices	No	Custom	(Mandatory) The public price is automatically used as the default price on all POS orders and customer sale invoices.
56	UC-07	Access Rights (Cashier)	Partial	Config	(Mandatory) Cashiers cannot manually change the price at POS unless they have the "Allow Price Edit at POS" role.
57	UC-07	Public Price Chatter log	Partial	Custom	(Auto) Any price change is logged in the product chatter and in a Price History sub-tab (date, old price, new price, changed by).
58	UC-07	Price Update Wizard	No	Custom	(Mandatory) A bulk price update wizard allows updating public prices for multiple products at once (percentage increase/decrease or fixed amount).
59	UC-07	Public Price Pricelists	No	Config	(Auto) Pricelists can override the public price for specific customer segments or promotional periods.
60	UC-07	Price Validation for Government Price Lock [Egypt Market]	No	Custom	(Mandatory) Default value: unchecked (price is free). the Public Price field becomes read-only for all users including Pricing Manager. Bulk price update wizard skips this product automatically. Pricelists cannot override the price for this product. Any attempt to change the price via API or import is rejected with error: "Price is government-regulated and cannot be changed."
61	UC-07	Access Rights (Manager)	Partial	Config	(Mandatory) When a Pharmacy Manager needs to update a locked price (e.g., official price revision): they must enter their credentials, and the change is logged in Price History user, Only a Pharmacy Manager can enable Government Price Lock flag.
62	UC-07	Zero-Check for Public Price	No	Config	(Auto) Public Price must be greater than 0 – a hard block prevents saving a product with zero or negative price.

#	UC ID	FEATURE	AVAILABLE IN ODOO?	TYPE	NOTES
63	UC-07	Selling below Product Cost soft-warning	Partial	Custom	(Manager) If Public Price is less than the current average purchase cost, a soft warning appears: "Selling below cost. Confirm?", Only the manager can proceed.
64	UC-08	Pharmacist Price (Avg. Purchase Cost)	No	Custom	(Mandatory) A field not editable from the product form as computed and displayed on the product form as a read-only field, The value shown is the weighted average cost (AVCO) calculated automatically by Odoo based on all validated supplier receipts.
65	Uc-08	Access Rights (Price/Pharmacy) Managers	Partial	Config	(Mandatory) The field is visible only to users with the "Pricing Manager" or "Pharmacy Manager" role, Cashiers and pharmacy technicians cannot see this field – it is hidden by their role profile.
66	UC-08	Pharmacist Price	Partial	Custom	(Mandatory) The field is clearly labelled: "Avg. Purchase Cost (Pharmacist)" with a small padlock icon to signal restricted access.
67	UC-08	Pharmacist Price Calculation	No	Custom	(Auto) The average cost is updated automatically every time a supplier purchase order is validated and goods are received, Formula: Avg Cost = Total Value of Stock On Hand / Quantity On Hand, displayed to 3 decimal places for precision.
68	UC-08	Pharmacist Price Display	No	Config	(Auto) If the product has never been purchased, the field shows "-" instead of Zero.
69	UC-08	Mini Trend	No	Custom	(Mandatory) A cost history chart (mini trend) can be shown on the product form to display cost movement over time [CUSTOM].
70	UC-09	A "Commission %" field	No	Custom	(Optional) The field accepts a decimal value between 0.00 and 100.00, if field is left empty or 0, no commission is calculated, Commission % is listed in the product's summary panel alongside Public Price and Avg Cost.
71	UC-09	Access Rights (Pricing Manager or Pharmacy Manager)	Partial	Config	(Mandatory) Commission field is visible to users with the Pricing Manager or Pharmacy Manager role.

#	UC ID	FEATURE	AVAILABLE IN ODOO?	TYPE	NOTES
72	UC-09	Product Commission Calculation	No	Custom	(Auto) When a product with a Commission % is sold, the commission amount is calculated on the net amount after discounts: $\text{Commission Amount} = (\text{Quantity} \times \text{Net Unit Price After Discount}) \times \text{Commission \%}$. This ensures commission reflects actual revenue, not the listed price, Discounts & promotions: if a product is sold with any discount or promotional price, commission is calculated on the discounted price, never the full public price, zero commission if free item or 100% discount is applied, Returns (credit notes): if a product is returned, the commission previously calculated for that line is reversed and deducted from the salesperson's commission balance in the same reporting period.
73	UC-09	Sale Order Line field (Commission %)	No	Custom	(Mandatory) The commission amount is shown on the sale order line as a read-only informational field.
74	UC-09	Commission Summary Report	No	Custom	(Mandatory) A Commission Summary Report shows total commissions per salesperson, per product, and per period, The commission report shows: Gross Commission (before returns) and Net Commission (after returns) as separate columns.
75	UC-09	Commission On/Off feature	No	Custom	(Mandatory) Commission calculation can be toggled on/off at the company level (some pharmacies may not use this feature)
76	UC-10	Max Qty per Invoice	No	Custom	(Mandatory) the field appears on the product form, visible only when Classification = Medicine only, The field accepts positive integers only. The quantity is measured in the product's Selling UoM, If left empty or 0, no restriction is applied and the cashier can sell any quantity.
77	UC-10	Access Rights (Product Configuration)	Partial	Config	(Mandatory) Editable only by users with the Product Configuration access right.
78	UC-10	Max Qty Tooltip	No	Custom	(Mandatory) "A tooltip explains: "Hard limit on quantity per sale invoice (in Selling UoM), applies at all stock levels. For unit-sold products, this is per tablet/capsule/vial. For package-sold products, this is per box/carton."

#	UC ID	FEATURE	AVAILABLE IN ODOO?	TYPE	NOTES
79	UC-10	POS/Sale Order Max Qty	No	Custom	(Auto) When a product is added to an invoice, the system checks if Max Qty per Invoice is configured, If the cashier enters a quantity greater than Max Qty per Invoice, a hard block popup appears. Error message: "You cannot sell more than [X] units of [Product Name] in a single invoice. Please create a separate invoice or reduce the quantity." and must be reduced to the qty limit to proceed.
80	UC-10	Access Rights (Pharmacy Manager)	Partial	Config	(Mandatory) Pharmacy Manager can override by entering their credential in an override dialog [configurable setting].
81	UC-10	Hard Block logging (runtime log file)	Yes	Custom	(Auto) All hard-block events are logged: product, quantity attempted, quantity limit, user, timestamp.
82	UC-11	Low-Stock Selling Limit Per Invoice	No	Custom	(Optional) Two fields visible only when Classification = Medicine: "Low Stock Limit (integer)", when Low must always be less than Low Stock Limit, a hard validation error on save if violated it triggers the restriction, "Max Qty per Invoice" When Low (integer), the maximum per invoice once triggered, If empty, the feature is inactive for that product.
83	UC-11	Access Rights (Product Configuration)	Partial	Config	(Mandatory) Low Stock Limit, and Max Qty per Invoice When Low fields are editable only by users with the Product Configuration access right.
84	UC-11	Low Stock Limit/Max Qty per Invoice When Low (soft-warning (dismissible))	No	Custom	(Dialog Options) When a product is added to an invoice, the system checks current on-hand stock in real time, If current stock is less than or equal to Low Stock Limit >> the restriction becomes active for that product on that invoice, if the cashier enters a quantity greater than Max Qty per Invoice When Low, a soft warning popup appears: Warning message: "Current stock of [Product Name] is low ([X] units remaining). The recommended maximum per invoice is [Y] units. Do you want to proceed with [entered qty] units anyway?" (Options: [Yes, Proceed (and the cashier can complete the sale with a higher quantity)] / [No, Adjust Quantity])
85	UC-11	Override Actions log (runtime log file)	Partial	Custom	(Auto) All override actions are logged: user name, product, quantity sold, stock level at time of sale, timestamp.

#	UC ID	FEATURE	AVAILABLE IN ODOO?	TYPE	NOTES
86	UC-11	Low Stock Badge	Partial	Custom	(Auto) A "Low Stock" badge is shown next to products currently at or below their Low Stock Limit in the product list view.
87	UC-11	Log Report Access (Pharmacy Manager))	Partial	Custom	(Mandatory) An override log report (accessible by the Pharmacy Manager) shows all cases where the soft warning was dismissed.
88	UC-11	Stock Level invoice line	No	Custom	(Mandatory) Stock level at time of sale is captured on the invoice line for audit purposes.
89	UC-12	Tracking field	No	Custom	(Mandatory) A "Tracking" field appears on the product form with three options: No Tracking (Default for Non-Medicine products) / By Lot Number (auto-selected/recommended) / By Serial Number. Tracking method cannot be changed after stock transactions have been recorded, hard block.
90	UC-12	Access Rights (Inventory Managers)	Partial	Config	(Mandatory) The selection is visible to all users but editable only by Inventory Managers.
91	UC-12	Tracking (Purchase Order)	No	Custom	(Mandatory) When Tracking = Lot Number: during stock receiving, the Lot/Batch Number field is mandatory for each product line. The receipt cannot be validated without it, when Tracking = Serial Number: a unique serial number must be entered for each individual unit. The system prevents entering the same serial number twice.
92	UC-12	Tracking Entry	Yes	Standard	(Mandatory) Already Exists!, Lot/Serial numbers are entered via manual keyboard input or barcode scanner.
93	UC-12	Lot Entry Dialog	No	Custom	(Mandatory) A bulk lot entry dialog allows pasting multiple lot numbers at once for large shipments.
94	UC-12	Sale/POS Nearest Expiry Tracking	No	Custom	(Auto) When a tracked product is sold, the system applies FEFO (First Expired, First Out) to automatically suggest the lot with the nearest expiry date.
95	UC-12	Access Rights (Cashier)	Partial	Config	(Mandatory) The cashier can see the lot number and expiry date of the stock being sold.

#	UC ID	FEATURE	AVAILABLE IN ODOO?	TYPE	NOTES
96	UC-12	Invoice Line Tracking lot/serial number	No	Custom	(Mandatory) The lot/serial number is printed on the sale receipt and saved on the invoice line for traceability.
97	UC-12	Excluding Expired lot	No	Custom	(Auto) If a specific lot is expired or quarantined, it is automatically excluded from selection.
98	UC-12	Traceability Report	Partial	Custom	(Mandatory) A Lot/Serial Traceability report is accessible from: Inventory > Reporting > Traceability. The report supports export to PDF and Excel.
99	UC-12	Lot Number Search	Partial	Custom	(Mandatory) Searching by lot number shows all movements: supplier > warehouse > sale > customer.
100	UC-12	Product Search	Partial	Custom	(Mandatory) Searching by product shows all lots currently in stock with quantities and expiry dates.
101	UC-13	"Has Expiry Date" checkbox field	No	Custom	(Mandatory) A "Has Expiry Date" checkbox appears on the product form. When checked, Lot/Serial tracking is automatically enabled (Tracking = By Lot at minimum), you cannot track expiry without lot tracking. Once checked and stock has been received, this checkbox cannot be unchecked, hard block.
102	UC-13	Expiry Alert (90 days)	No	Custom	(Mandatory) A configurable "Expiry Alert (Days Before)" field appears when "Has Expiry Date" is checked (default: 90 days).
103	UC-13	Purchase Receipt	No	Custom	(Mandatory) For any product with "Has Expiry Date" checked, the Expiry Date field becomes mandatory on every purchase receipt line, the purchase receipt cannot be validated without an expiry date for all such products Expiry dates are entered per lot/batch with it's own expiry date.
104	UC-13	Auto Rejecting today's Expiry	No	Custom	(Auto) The system rejects any expiry date that is earlier than today's date (cannot receive already-expired stock into sellable inventory). Error message: "Expiry date for [Lot No.] of [Product] is in the past. Please verify and correct before validating receipt."

#	UC ID	FEATURE	AVAILABLE IN ODOO?	TYPE	NOTES
105	UC-13	Soft Expiry Warning (30 days)	No	Custom	(Mandatory) Expiry dates that are within 30 days of today trigger a warning: "This lot expires soon. Consider rejecting or quarantining.", soft warning, can proceed.
106	UC-13	FEFO (First Expired, First Out)	No	Custom	(Mandatory) The system applies FEFO (First Expired, First Out) automatically when allocating stock for sales and POS orders, (earliest) expiry date is always selected first, (expiry date < today) are automatically blocked from being selected in any sale order or POS transaction.
107	UC-13	Scrap location for Expired products	Partial	Custom	(Mandatory) An expired lot can only be moved to the Quarantine or Scrap location, never to a customer.
108	UC-13	Invoice Line Expiry date	No	Custom	(Mandatory) The expiry date and lot number of sold stock are printed on the sale receipt and stored on the invoice line.
109	UC-13	Expiry Date Scheduled Action	No	Custom	(Mandatory) A scheduled action runs every night and checks all lot expiry dates.
110	UC-13	"Near- Expiry" dashboard.	Partial	Standard	(Auto) Lots expiring within the configured "Expiry Alert" window (default 90 days) appear in the "Near- Expiry" dashboard.
111	UC-13	Expiry Notification Email	Partial	Custom	(Auto) Lots expiring within 30 days: an automatic email is sent to the responsible Inventory Manager.
112	UC-13	Quarantine already Expired Products	No	Custom	(Auto) Lots where expiry date < today: the lot is automatically moved to the Quarantine location and flagged as "Expired", quarantined/expired lots cannot be sold, hard block at POS and sale order.
113	UC-13	Quarantine Release (Pharmacy Manager)	No	Custom	(Mandatory) A Quarantine Release workflow exists: only a Pharmacy Manager can review and decide: Return to Supplier / Destroy / Re-classify.
114	UC-13	Expiry Overview	No	Custom	(Mandatory) A dedicated "Expiry Overview" dashboard shows: all near-expiry lots (by product, location, days remaining, quantity), all expired and quarantined lots, total value of near-expiry stock, filter by: product, category, location, days to expiry, can export to pdf/excel for managers to review.
